

# Exquisite Bots

A fun fast-paced drafting, deck building  
card game.

**2-6 PLAYER | AGES 10+ | 30MINS**

The production line has become congested and robot production is at six's and seven's.  
Who can build their robot the fastest? Match symbols and colours across the various  
parts of robots to score the highest points.

## Components:

Exquisite Bots is made up of x70 cards (x10 cards per  
robot, x7 robots)

## Objective:

To construct a complete matching robot the quickest.

## Game set-up:

Each player is dealt one of the seven robot torsos. The  
remaining cards are shuffled and three are dealt to each player.  
In the middle of the playing area three cards are placed face  
up, with the remaining deck face down next to them.

## Game play:

A turn consists of taking a card of choice from those  
visible or taking a random card from the face down deck. If  
a card is taken from the three visible cards a replacement  
is drawn from the deck. This process is continued until all  
players have ten cards in hand.

Now as a card is drawn, a card must be discarded, forming  
a discard pile. Players can now take from the three visible  
cards, the deck or from the top of the discard pile.

Players are monitoring their hand of cards by the robot  
limbs they require to complete their bot.

There are seven unique bots. Each consists of a torso, a  
head, two arms and two legs (which both consist of two  
parts, an upper and lower limb section).

Limbs can match by colour or by the symbols they contain.  
These will match either the upper/lower section of the limb  
or the alternative side of the bot, i.e. the left to the right.

Each card displays the body part, the colour, two symbols  
and a value.

Once a player completes construction of their robot, they  
count up the various score of body parts, plus a +10 for  
finishing first. If the robot is all the same colour there is an  
added +10 bonus. Other players can add up complete  
limbs of their bots, to score.

The game is played across three rounds, who ever has the  
highest score at the end wins.

Please scan the qr code, fill in the questionnaire if you  
played the game and check out some other games.
